1. Claims 1-9 are rejected under 35 USC 112 (second paragraph) as being indefinite in the recital of "comprising having" (see lines 2 and 3 of claim1).

The terms "comprising" and "having" appear to be redundant.

2. Claims 1-5, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitsuo et al. for the reasons of record.

The fact that no prior art example employs a mixture of carboxymethyl cellulose and hydroxyethyl cellulose fails to obviate the clear suggestion to employ the aforementioned materials together. Applicants' specification examples are not dispositive of the issue of patentability since the Comparative Examples have etherification degrees far outside the etherification degrees (i.e., 0.6-0.8) disclosed by Mitsuo et al.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1774

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
